LECTURE NOTES ON MICROWAVE ENGINEERING

APPLICATIONS OF MICROWAVE ENGINEERING • Antenna gain is proportional to the electrical size of the antenna. At higher frequencies, more antenna gain is therefore possible for a given physical antenna size, which has important consequences for implementing miniaturized microwave systems.

About the Tutorial

Microwave Engineering 1 Electromagnetic Spectrum consists of entire range of electromagnetic radiation. Radiation is the energy that travels and spreads out as it propagates. The types of electromagnetic radiation that makes the electromagnetic spectrum is depicted in the following screenshot. Let us now take a look at the properties of Microwaves.
